

UNIVERSE MANAGEMENT SOLUTIONS

In a program audit, the CMS analyzes universes (CDAG, ODAG, CPE, FA, SNP-MOC, SARAG, CCQIPE) and other regulatory reports to evaluate health plan performance. Despite current innovations, it remains a constant challenge for health plans to create and submit accurate and timely universes to avoid invalid data submissions and poor audit scores.

Inovaare's Universe Management suite is an end-to-end solution for efficient, accurate and proper formatting of CMS universes. Comprised of three standalone modules, Universe Management can be seamlessly integrated to ensure health plans submit CMS-compliant reports with the touch of a button.

Achieve greater efficiencies in minutes

<10%

Reduce time preparing universe submissions

Now you can review 100% of your universe data. Information is beneficial to identify and remediate risk before a regulatory audit.

<IT

Generate universes with little dependency on IT resources

A report is generated to address any data validation issues, as well as provide insights into your Compliance Program Effectiveness.

<50%

Require fewer resources to manage, monitor and audit FDRs

Efficiently aggregate FDR data into your universe submissions. The Universe Aggregator provides a single tool to manage and automate all FDR processes.

GENERATOR

SCRUBBER

AGGREGATOR

UNIVERSE SCRUBBER

Universe Scrubber is a cloud-based compliance solution that scrubs Medicare universe tables in three simple steps:

1. Upload the report file
2. Scrub the universe to validate data
3. Review the results

With the click of a button, health plans can:

- > Ensure correct CMS formatting with inclusion/exclusion and timeliness rules built in
- > Receive actionable insights based on real-time data
- > Scrub all CMS universes (ODAG, CDAG, SARAG, CPE, FA, SNP-MOC, CCQIPE)
- > Detect all errors in universe schematics, data and business logic
- > Submit timely reports

UNIVERSE GENERATOR

Just connect your data and generate CMS universes with the touch of a button. It's really that simple.

With Universe Generator, you can now:

- > Fulfill your own data or query requests
- > Sustain audit readiness at all times through automated monitoring
- > Reduce the risk of penalties and low star ratings with fast report turnaround times

The improved workflows empower compliance teams to be proactive.

UNIVERSE AGGREGATOR

Gather data for requested date ranges to create clean universes for submission, even from multiple submitters providing the same universe table. The Universe Aggregator compiles scrubbed universes into a single table for continuously compliant CMS report submission.
